

Thanks to modern technology, it is always possible to work together over long distances without any problems. You would think that meetings **"face to face"** have become or could become unnecessary. But this is not the case, quite the contrary.

Meetings are irreplaceable.

While video chats, webinars and virtual conferences with several participants usually have a rigid schedule and framework, a **"real life" meeting** can be paused at any time to allow everyone to catch a head full of fresh air - or extended if the issues under discussion have not yet been satisfactorily clarified.

So despite all the modern technology, meetings are far from out of date, but for them to be successful, the right conditions should be created. With us you will certainly have the best meetings!

Plexiglass separation for your safety!

From September 2020, you can again hold meetings with 100 people in the large hall "Lübeck" of the Radisson Blu Senator Hotel. Our flexible plexiglass partition walls offer you optimal protection even during the conference.

Safe by a distance!

We have measured all meeting rooms in our **Radisson Blu Senator Hotel** and our **Park Inn by Radisson** and guarantee a minimum distance of 1,5 metres. In almost all meeting rooms you can open windows for air exchange or use our air conditioning with filters.

New and exclusive - the library!

In our Radisson Blu Senator Hotel our new library has been created. Perfectly equipped, you can hold a meeting or have an exclusive dinner here in a unique setting. A maximum of 14 people can be seated at the 4,5 metre long solid wood table. The chandelier with 72 lights creates a special atmosphere. A large screen is available for your multimedia presentation.

Radisson Blu Senator Hotel - The Nautilo

Our Restaurant Nautilo was completely redesigned this year and equipped with an additional floor, which has direct access to the meeting floor. The Nautilo Bar integrated into the restaurant is offering a fascinating atmosphere in an ambience based on the underwater world.

Enjoy a lunch buffet on deck 3 or have a menu served on deck 1 or 2 - our new restaurant offers you many possibilities.

A special highlight is the extraordinary, colour-changing light installation in the design of 3 jellyfish made of clear crystal beads and 100 mouth-blown crystal beads above the Nautilo Bar.

Have we made you curious?

Our Meeting & Event Team is at your disposal for your questions, wishes and reservations.
